Molina Provider News:

Molina Healthcare of FL (MFL) has partnered with CVS Health to offer prescribing providers real-time prescription benefits information via the Real Time Benefit Check tool. Using this tool can help your practice decrease frustration for patients at the pharmacy counter, build efficiency through increased submission of electronic prior authorization requests, and increase compliance with the Florida Medicaid Preferred Drug List for Medicaid members or with the Molina Formulary for Marketplace and Medicare members.

This service is free of charge to you and can be accessed through your electronic health records. Below are some additional benefits to using the Real Time Benefit Check tool.

Real-Time Prescription Benefits Information at the Point of Care

Get more affordable, covered medications to your patients faster. When you write a prescription using your electronic health record (EHR) system, for each individual patient you can instantly:

Know if the drug is covered and the patient's out-of-pocket cost (if applicable)

See up to five clinically appropriate brand or generic alternatives

Know if a therapy requires prior authorization (PA) or has other restrictions

The following systems are providing real-time prescription benefits. There's no charge for the service; however, you will need the latest version of your EHR.
