

Site of Care Drug List

On 1/1/2021, Molina implemented a Site of Care policy for Medicaid and Marketplace that may result in a change in the place of service for certain medically necessary provider administered medications (HCPCS J Codes). These medications are required to be rendered in the most appropriate setting such as home or independent infusion centers (place of service 11 or 12) and not in a hospital setting unless it meets medically indicated exceptions. The list below includes the medications and classes that will be impacted by this change. Please note this list includes medications that do and do not require a prior authorization. The requested medication is being reviewed for medical necessity for the condition being treated. Any claim submitted for these medications performed in a hospital setting will be denied regardless of the authorization of the drug.

Please note: To make the prior authorization referral process more efficient when administration is not occurring in a provider office setting, please send prescription order directly to one of the listed infusion service providers (Palmetto Infusion, Coram, Intramed, Orsini). The infusion provider will complete the PA process for you.

Coram - phone: (803) 731-5076 or fax: (903) 551-2245 for Columbia and upstate phone: (843) 744-4183
or fax: (843) 743-2902 for Charleston/Low country region

Palmetto Infusion - phone: (800) 809-1265 (central number-15 locations in SC)

Intramed Plus - phone: (803) 999-1750 or fax: (803) 999-1754

Orsini - phone: (800) 410-8575 or fax: (847) 734-1822 or Email: contracting@orsinihc.com
